

Portable Air Conditioner with Digital Controls

This portable air conditioning unit provides personal cooling in small spaces. It has integrated wheels, a digital display, and adjustable fan speeds.

Product Overview

Compact Cooling Solution

The YDF-40D is a portable air conditioning unit engineered for efficient localized cooling in compact environments. Featuring an integrated handle and smooth-rolling wheels, this unit offers exceptional maneuverability for offices or small rooms. It combines a durable metal housing with user-friendly digital controls to ensure a reliable and comfortable climate experience.

Performance Metrics

Key Performance Indicators

4000 BTU

Cooling Capacity
