

Portable Air Conditioner with Multi-Vane Air-flow

This portable air conditioner is designed for personal cooling in indoor environments. It features a multi-vane front grill for directing airflow, a water level indicator, and caster wheels for mobility.

Product Overview

Efficient Portable Cooling Solution

This portable air conditioner is engineered for versatile indoor climate control, featuring a sophisticated multi-vane airflow system for precise cooling direction. Designed with mobility in mind, it includes integrated caster wheels for easy relocation between rooms. The unit combines a sleek two-tone aesthetic with practical features like an intuitive top-mounted control panel and a clear water level indicator for maintenance.
