

Portable Air Conditioning Unit

This is a portable air conditioning unit ideal for personal or small space cooling. The unit features adjustable louvers, a multi-stage filtration system and a user-friendly control panel.

Overview

Efficient Portable Cooling

This portable air conditioning unit is designed to provide effective climate control for small to medium-sized spaces. With a cooling capacity of 9000 Btu, it ensures rapid temperature reduction while maintaining energy efficiency. Its compact, mobile design allows for versatile placement in offices, workshops, or residential areas, making it a flexible solution for professional cooling needs.

Performance

Cooling Capacity

9000 Btu
Capacity

Air Circulation

400 m3/h

Technical Specifications

Refrigerant Type & Charge

- Refrigerant: R407C
- Charge Amount: 450g

Model Number

KY-26 / A

Power Supply

220-240 V / 50 Hz

Refrigeration Power Consumption

1000 W

Physical Attributes

Net Weight

35 kg
