

Portable Air Purifier and Cooler with Digital Controls

This portable unit combines air purification, filtration, and water-based cooling. It features a digital control panel and water tank with level indicators for convenient monitoring.

Product Overview

Innovative Air Quality Solution

This portable air purifier and cooler provides a comprehensive approach to indoor climate control by combining advanced air filtration with water-based cooling. Its compact, modern design includes a top handle for effortless portability, making it suitable for a variety of indoor environments. Equipped with intuitive digital controls and clear water level indicators, this unit ensures a user-friendly experience while maintaining optimal air quality and comfort.

Technical Specifications

Key Functional Features

- Portable design with integrated top handle
- Digital control interface
- Integrated air purification system
- Water-based cooling technology
- Visual water level indicator

Certifications & Application

Application

Indoor Use, Air Cooling, Air Purification
