

Portable Angled Eyepiece Spotting Telescope

This telescope is suitable for outdoor scenery, animal observation, and astronomical viewing. It features an adjustable eyepiece for variable magnification and a built-in mounting bracket for tripods.

Product Overview

Professional Field Observation

This portable spotting telescope is engineered for versatile, high-clarity viewing in various field conditions. Featuring an angled eyepiece design, it ensures comfortable observation at diverse elevations, making it an excellent choice for extended periods of use. Its durable yet lightweight construction offers the perfect balance of portability and resilience for demanding outdoor environments.

Technical Specifications
