

# Portable Automotive Battery Charger

This portable battery charger is designed for various battery types. It features an analog ammeter to monitor charging current and color-coded clamps for easy connection.

## Product Overview

### Professional Charging Solution

The SUPER13 is a robust, portable battery charger engineered for versatility across various battery types. Designed with a durable red enclosure and an integrated carrying handle, it ensures reliability and ease of transport in automotive and workshop environments. It features an intuitive analog ammeter for real-time current monitoring and color-coded clamps for safe, efficient connections.

## Technical Specifications

### Monitoring

Analog Ammeter

### Design Features

- Robust red enclosure
- Integrated carrying handle
- Mode selection switch

<b>Model</b>	SUPER 13
<b>Connection</b>	Color-coded clamps
<b>Application</b>	Automotive and general battery charging
