

# Portable Bag Stitching Machine

This portable sewing machine is designed for closing bags made of paper, burlap, plastic, cotton, PP woven cloth and other materials. It is suitable for industries such as agriculture, food processing, chemical, and logistics.

## Overview

### Professional Bag Closing Solution

The GK8-1 is a portable bag stitching machine engineered for efficient sealing of various bag types, including paper, burlap, plastic, cotton, and PP woven cloth. Designed for versatility, it supports diverse industries ranging from agriculture and food processing to chemical and logistics sectors. Its lightweight construction and high-speed operation make it an ideal choice for both stationary production lines and mobile on-site applications.

## Technical Specifications

Model Number	GK8-1
Stitch Type	Single-thread chain stitch
Key Features	High-speed operation, Automatic thread cutting, Adjustable stitch length, Portable design

## Application

### Compatible Bag Materials

- Paper
- Burlap
- Plastic
- Cotton
- PP Woven Cloth

### Target Industries

Agriculture • Food Processing • Chemical • Logistics
