

Portable Belt Sander for Material Removal

This portable belt sander is designed for rapid material removal and surface finishing on various materials. It is ideal for shaping, smoothing, and preparing surfaces in woodworking, metalworking, and other applications.

Product Overview

High-Efficiency Material Removal

This portable belt sander is engineered for rapid material removal and precision surface finishing across a wide range of substrates. Featuring a robust motor and adjustable belt tracking, it ensures consistent performance for demanding woodworking and metalworking tasks. The integrated dust collection system promotes a cleaner, safer workspace, making it an essential tool for professional surface preparation.

Certifications

CE • GS • TUV Rheinland • Geprüfte Sicherheit

Technical Specifications

Key Features

- Robust motor for heavy-duty use
- Adjustable belt tracking mechanism
- Integrated dust collection system

Application

Woodworking, Metalworking, Surface Finishing, Material Removal
