Product Overview

Professional Signal Metering

This portable DVB-T/T2 signal meter is designed for precise antenna alignment and signal verification in the field. It offers seamless integration with mobile devices via a dedicated Android and iOS application, utilizing Bluetooth 4.2 for reliable data transfer. With features like constellation analysis and audible signal finding alarms, it serves as an essential tool for technicians requiring efficient, on-the-go signal diagnostics.

Technical Specifications

Signal Compatibility	DVB-T, DVB-T2
Bluetooth Version	4.2
Constellation Support	256QAM

Power & Battery

Operating Time	3 hours
Charging Input	DC 5V

Features

Core Features

- Android and iOS App Integration
- Audible Signal Finding Alarm
- Multi-Language Support
- Portable Compact Design
