

Portable Circular Saw

This portable circular saw is designed for cutting wood and other materials. It features a high-speed motor, adjustable cutting depth, and a safety guard.

Product Overview

Professional Cutting Versatility

This portable circular saw is engineered for high-precision cutting across a variety of wood and construction materials. It features a robust high-speed motor and an adjustable cutting depth system, providing the flexibility needed for professional woodworking and construction tasks. Integrated safety guards ensure operator protection while maintaining efficient workflow on the job site.

Technical Specifications

Key Performance Metrics

1 High-speed
Motor

Adjustable Features

- Adjustable cutting depth
- Safety guard mechanism

Application

Primary Applications

Construction, Woodworking, DIY Projects
