Product Overview

Advanced Portable Sanitization Solution

This portable clothes sanitizer utilizes dual-action UV lamp technology and ozone sterilization to eliminate germs on garments, towels, mobile phones, and personal items. Designed for both home use and travel, it features an automatic one-button microcomputer control system for effortless operation. Its compact, fashionable design ensures you can maintain hygiene standards wherever you go, providing a powerful alternative to traditional sun-drying methods.

Technical Specifications

Sterilization Technology	UV Lamp, Ozone Sterilization
