

Portable Column Array Speaker with Bluetooth and DSP

This portable array speaker system delivers high-quality sound reinforcement in various applications. It features a modular design with a subwoofer base and column array speaker for easy setup and transport.

Overview

High-Performance Portable Column Array

This portable column array speaker system is engineered for professional sound reinforcement, combining a powerful 10-inch subwoofer with a modular column design for exceptional vocal clarity and wide dispersion. It features integrated DSP sound effects and versatile connectivity options including Bluetooth, TWS, and dedicated inputs for microphones and guitars. Designed for ease of transport and rapid setup, it is an ideal solution for live performances, presentations, and high-quality karaoke applications.
