Overview

Versatile Portable Cooling Solution

This portable compressor refrigerator and freezer offers a 3-in-1 solution, functioning effectively as a fridge, freezer, or traditional cooler. Designed for both outdoor adventures and home use, it features robust thermal insulation and precise temperature control. With advanced energy-saving modes and multi-voltage power compatibility, it ensures your food and drinks stay fresh during long road trips or camping excursions.

Performance

Temperature Range	0°F to 50°F (-18°C to +10°C)
Operating Modes	MAX Mode (Fast Cooling), ECO Mode (Energy Saving)
Off-Power Insulation	90 hours

Power & Electrical

Voltage Compatibility

- 12V DC
- 24V DC
- 110V AC
- 220V AC

Battery Protection

3-Stage Dynamic Protection • Low-Voltage Cutoff • Current Overload Protection

Features

Core Functionality

- Compressor-based cooling system
- Rotomolding design for durability
- 30° Anti-shake functionality
- EMC anti-electromagnetic interference

Usage Applications

Camping, Road Trips, Home Use, Picnics
