

# Portable Concrete Mixer

These concrete mixers are designed for small to medium-sized projects. They offer efficient mixing and durable performance for producing homogenous concrete mixes on-site.

## Product Overview

### Versatile On-Site Mixing

This portable concrete mixer is designed to provide reliable performance for small to medium-sized construction projects. Featuring a robust construction with durable drums, it offers an efficient solution for producing homogenous concrete mixes directly on-site. The unit is engineered for ease of use and maneuverability, helping to reduce labor costs and improve overall construction efficiency.

## Classification

### Classification Methods

- Charging Method: Horizontal or Vertical
- Work Nature: Batch or Continuous
- Mixing Method: Gravity or Forced Action
- Application: Horizontal or Vertical
- Placement: Stationary or Portable

## Design & Mobility

### Build Quality

Robust Construction • Durable Drum

### Power Source Options

Electric Motor, Gasoline Engine

### Mobility Features

Yes
