

Portable Concrete Mixer with 7/10 cu ft Capacity

This portable concrete mixer has a capacity of 7/10 cubic feet. It can be equipped with optional wire rope hoisting or hydraulic hoisting.

Overview

Heavy-Duty Portable Concrete Mixer

The TDCM200-7D is a robust and reliable concrete mixer designed for demanding construction environments. Featuring a 320L unmixed capacity and 200L mixed capacity, this unit ensures efficient blending of cement and aggregates with a 60-second mixing cycle. Built on a heavy-duty steel chassis, it offers durability and longevity, while the integrated loading hopper simplifies material handling on-site.

Technical Specifications

Model Number	TDCM200-7D
HS Code	847431000

Performance Metrics

Key Performance Indicators

320 L

Unmixed Capacity

200 L

Mixed Capacity

60 s

Mixing Time

22 r.p.m

Drum Speed

Mechanical Details

Power Source	Diesel engine, water cooled with radiator
Transmission	Chain drive
Clutch System	Mechanical clutch drive

Physical Dimensions

Dimensions (L*W*H)	1930*2300*2950mm
Weight	1250 kg

Features

Loading Hopper	Heavy Duty, Wire Rope, Brake, Clutch
Chassis	Heavy duty robust steel
