

Portable Concrete Mixer with Rotating Drum

This portable concrete mixer is designed for small to medium-scale construction projects. It features a rotating drum for thorough mixing and is mounted on a wheeled chassis for easy maneuverability.

Overview

High-Efficiency Portable Concrete Mixer

The JF100 portable concrete mixer is engineered for small to medium-scale construction projects, offering reliable performance and mobility. Its drum is manufactured using advanced molding techniques rather than welding, ensuring superior durability and mixing efficiency. Designed for versatility, it supports multiple power configurations including electric, diesel, and gasoline options to suit various job site requirements.

Technical Specifications

Drum Capacity	500 L
Discharge Volume	140 - 210L
Mixing Drum Speed	25 r/min
Rotation Speed	3000 r/min
Total Weight	490 kg

Power Options

Engine & Motor Options

- 4 kW Electric Motor
- 6 hp Diesel Engine
- 5.5 hp Gasoline Engine
