

Portable Conductivity Meter

Portable meter designed for assessing conductivity in various solutions. It features a graduated scale with indicator points for straightforward readings of nutrient levels.

Product Overview

Portable Nutrient Conductivity Meter

This portable conductivity meter is specifically designed for efficient, on-the-go measurement of nutrient solution levels. Housed in a durable, cylindrical casing with protective end caps, it ensures reliable performance in various field environments. The device features a clear, graduated scale with intuitive indicator points, allowing for rapid assessment and easy reading of conductivity levels.

Physical Characteristics

Form Factor

Portable • Handheld

Housing Design

Cylindrical with protective end caps

Operational Features

Measurement Type

Conductivity (CF)

Interface

Graduated scale with indicator points

Primary Application

Nutrient Metering, Conductivity Monitoring
