Product Overview

Portable Currency Authenticator

This compact, handheld device is designed for quick and reliable verification of banknotes in any business environment. Featuring both ultraviolet (UV) and torch functions, it allows users to easily check currency security features and watermarks on the go. Its durable, innovative circuit board design and high-quality UV tubes ensure long-lasting performance and consistent illumination intensity.

Technical Specifications

Key Design Features

- Mini compact design
- Portable handheld shape
- Integrated wrist strap
- Innovative electric circuit board

Durability & Build

1 Innovative

Circuit Design

1 High-Grade

UV Tube Quality

Power Source

4 x AA Batteries

Detection Methods

Ultraviolet (UV), Watermark Detection, Torch/Flashlight
