

Portable DC Inverter TIG/MMA/Plasma Welder Cutter

This is a portable DC inverter welder suitable for MMA, TIG, and plasma cutting applications. It features adjustable amperage control from 10A to 120A and is designed with ventilation to prevent overheating.

Product Overview

Versatile 3-in-1 Welding Solution

This portable DC inverter welder offers a comprehensive 3-in-1 solution, combining TIG, MMA, and plasma cutting capabilities in a single compact unit. Engineered with high-quality MOSFET technology, it delivers stable performance and is designed to withstand voltage fluctuations effectively. With advanced features like hot start, anti-stick, and strong arc force, this machine is built to provide reliable results for professional welding and cutting tasks.

Technical Specifications

Amperage Range

10 A

Minimum Current

120 A

Maximum Current

Core Features

- Hot start functionality
- Anti-stick protection
- Strong arc force control
- Internal fan-cooling system
- Voltage fluctuation resistance

Supported Modes

TIG, MMA, Plasma Cutting

Internal Components

Fuji Japan MOSFET

Compliance and Safety

Certifications

CE

Panel Indicators

- Power Indicator
- Over-current (O.C) Indicator
