Product Overview

Portable Cooling Solution

This 15L portable DC refrigerator is engineered for efficient cooling in mobile environments. Designed with rugged construction, integrated wheels, and a telescopic handle, it offers exceptional portability for camping, outdoor adventures, and vehicle-based applications. The unit features precise digital temperature control and supports DC 12V/24V power inputs, making it fully compatible with solar and battery-powered systems.

Technical Specifications

Capacity	15 L
Power Input	DC 12V, DC 24V
Control System	Digital control panel with temperature adjustment

Features & Design
