

Portable Dehumidifier with Water Tank

This portable dehumidifier is designed to reduce humidity in indoor spaces. It comes with a water collection tank and air vents for effective moisture removal.

Product Overview

Professional Grade Dehumidification

This portable dehumidifier is engineered for efficient moisture control in professional and commercial environments. Featuring a sleek, durable silver and dark gray finish, the unit integrates a high-capacity water tank with a transparent level indicator for real-time monitoring. Its optimized design with top air vents ensures maximum airflow, making it an ideal solution for maintaining optimal air quality and preventing humidity-related damage.

Technical Specifications

Monitoring

- Integrated Water Level Indicator
- Removable Collection Tank

Design & Construction

Portable Design, Silver & Dark Gray Finish, Top Air Vent System

Performance Metrics

Operational Efficiency

20 L/day

Moisture Extraction Capacity
