

Portable Desiccant Dehumidifier for Household and Commercial Use

This portable desiccant dehumidifier is designed for both household and commercial use. It effectively removes moisture from the air using a desiccant rotor, making it suitable for basements, storage areas, and industrial spaces.

Overview

High-Efficiency Desiccant Dehumidification

This portable desiccant dehumidifier is engineered for both household and commercial environments, providing reliable moisture control in a variety of settings. Its robust, shock-proof construction ensures durability, while the lightweight design allows for easy transport and placement. Capable of operating efficiently in temperatures as low as -20°C, it is an ideal solution for basements, storage areas, and other spaces prone to moisture-related issues.

Performance & Features

Minimum Operating Temperature	-20 °C
Key Features	Portable, Shock-proof, Easy to service, Wall mountable

Usage

Suitable Applications

- Private households
- Basements
- Storage areas
- Commercial spaces
