

Portable Diesel Generator

This portable diesel generator is designed for providing a reliable power supply. It features a durable frame, electric start, and multiple outlets suitable for construction sites, outdoor events, and emergency backup.

Overview

Reliable Power Anywhere

The AG-MA-3000E is a portable diesel generator engineered for consistent and reliable power supply in demanding environments. Featuring a durable frame and electric start, it is designed for ease of use across construction sites, outdoor events, and emergency backup scenarios. Its fuel-efficient engine and integrated safety features, such as overload protection, ensure performance and peace of mind.

Technical Specifications

Model Number	AG-MA-3000E
Engine Type	Diesel

Features

Suitable Applications

- Construction sites
- Outdoor events
- Emergency backup power

Key Features	Portable, Electric Start, Fuel Efficient, Overload Protection
