

Portable Diesel Generator with Water Pump

This portable diesel generator combines power generation with water pumping functionality. It is equipped with a fuel tank, air filter, and protective steel frame for durability and easy transport.

Product Overview

Versatile Power and Pumping Solution

This portable diesel generator is engineered for reliable performance in remote locations and emergency scenarios. Combining power generation with a high-efficiency water pump, it is an ideal tool for agricultural irrigation, construction sites, and disaster relief operations. The unit is housed in a durable steel frame, ensuring longevity and ease of transport in demanding environments.

Certifications & Compliance

Compliance Standards

CE, EPA, XIPU

Key Features

Core Features

- Integrated water pump attachment
- Robust protective steel frame
- Portable design for remote use
- Integrated fuel tank and air filtration system

Applications

Primary Applications

Irrigation • Construction • Emergency Power • Water Transfer
