

Portable Diesel Generator with Water Pump

This portable diesel generator features a robust frame, air-cooled diesel engine, and a centrifugal water pump. It is suitable for irrigation, construction, and emergency water supply.

Product Overview

Versatile Power and Pumping Solution

This portable diesel generator is engineered for demanding environments, combining reliable power generation with high-performance water pumping capabilities. Built with a robust frame and an air-cooled engine, it is designed for consistent operation in irrigation, construction sites, and emergency water supply scenarios. Its integrated design ensures efficient water transfer and dependable service when you need it most.

Technical Specifications

Engine Type	Air-cooled diesel engine
Primary Applications	Irrigation, Construction, Emergency Water Supply

Key Features

Design Highlights

- Robust protective frame
- Integrated centrifugal water pump
- Durable hose connection ports
- Portable design for field use

Compliance

Air Cooled
