

Portable Diesel Power Generator

This diesel generator is a reliable source of portable power. It features a robust engine, a durable frame for protection and transport, and a user-friendly control panel with various outlets and monitoring gauges.

Product Overview

Reliable Portable Power Solution

This portable diesel generator is designed to provide a robust and dependable power source for demanding environments. Featuring a durable frame for enhanced protection and easy transport, it is an ideal solution for construction sites, outdoor events, and emergency backup power requirements. The unit includes a user-friendly control panel equipped with monitoring gauges and multiple outlets to ensure safe and efficient operation.

Performance Specifications

Rated Output

4 kW Rated Output	4.5 kW Max Output
-----------------------------	-----------------------------

Electrical Characteristics

Parameter	Value
Rated Voltage	220V
Rated Frequency	50Hz
D.C. Output	12V-8.3A
Power Factor	1

Technical Details

Insulation Grade

Grade B

Engine Model	LL90F-4T
Weight	50 kg
Excitation System	Self-Excited
Battery Type	GFM-21 Rechargeable Sealed Lead-Acid Battery

Usage & Safety

Ideal Applications	Construction Sites, Outdoor Events, Emergency Backup
