

Portable Diesel Water Pump

This is a portable diesel water pump, designed for efficient water transfer in various applications. It features a robust diesel engine for reliable power, a durable pump housing for longevity, and a protective frame for portability and stability.

Overview

High-Efficiency Portable Diesel Pump

This professional-grade portable diesel water pump is engineered for demanding fluid transfer applications including agricultural irrigation, construction site dewatering, and emergency flood management. Featuring a robust diesel engine and a reinforced protective frame, it offers reliable performance in challenging field environments. The self-priming capability and ability to handle suspended solids ensure versatile and consistent operation where power and durability are paramount.

Performance Metrics

Key Operational Capabilities

Self-priming, Handles solids, Portable design, Heavy-duty engine

Technical Specifications

Engine Type

Diesel

Build Quality

Durable pump housing with protective stabilization frame

Applications

Common Industry Applications

- Agricultural Irrigation
- Construction Dewatering
- Emergency Water Removal
