

Portable Diesel Water Pump

This diesel water pump is a portable and robust solution for various water transfer applications. Featuring a durable frame for protection and easy transport, it is powered by a reliable diesel engine.

Overview

Portable Diesel Water Pump

This diesel-powered water pump is engineered for robust performance in demanding environments, offering a reliable solution for water transfer applications. Designed with portability in mind, the unit features a durable protective frame that facilitates easy transport and setup on job sites. It is highly efficient for tasks ranging from agricultural irrigation and construction dewatering to emergency water removal, ensuring dependable operation when and where it is needed most.

Key Features

Design Highlights

Portable • Durable Frame • Diesel Powered • Compact

Suitable Applications

Irrigation, Construction, Emergency Water Removal, Water Transfer
