

Portable Diesel Water Pump for Irrigation

This portable diesel water pump is engineered for efficient water transfer across diverse applications. It combines a robust diesel engine with a centrifugal pump, all mounted on a durable frame for ease of mobility and operation.

Overview

High-Efficiency Diesel Water Pump

This portable diesel water pump is engineered for reliable water transfer in demanding environments. Featuring a robust diesel engine coupled with a high-performance centrifugal pump, it is mounted on a sturdy frame to ensure easy transport and stability during operation. This versatile unit is ideal for agricultural irrigation, construction site dewatering, and emergency water removal tasks.

Technical Specifications

Engine Type	Diesel
Drive Mechanism	Belt-driven
Pump Type	Centrifugal

Usage & Applications

Ideal Applications	Irrigation, Construction, Emergency Water Removal
--------------------	---

Design Features

Portability	Yes
Frame Construction	Sturdy transport frame
