

Portable Digital Alcohol Tester

This is a portable alcohol tester used to measure blood alcohol content. It features a digital display and indicator lights.

Product Overview

Portable Digital Alcohol Tester

This portable digital alcohol tester is a compact and reliable tool designed for quick blood alcohol content (BAC) analysis. Featuring an intuitive LED indication system, it provides clear, immediate feedback on safety levels, making it an essential device for personal responsibility. Its convenient keychain design ensures portability, while the standard battery operation allows for easy use anywhere.
