

Portable Digital Alcohol Tester

This portable alcohol tester features a digital display for easy reading of blood alcohol content. Its compact design includes a keychain for convenient carrying and provides quick, reliable results with simple operation.

Product Overview

Compact Alcohol Detection

The Portable Digital Alcohol Tester is a compact, handheld device designed for quick and reliable blood alcohol content (BAC) monitoring. Utilizing an advanced semiconductor oxide sensor, it provides precise measurements with a rapid response time of under five seconds. Its lightweight, portable design includes a convenient keychain attachment, making it an ideal tool for personal safety and responsible monitoring in various environments.

Technical Specifications

Sensor Technology	Advanced semiconductor oxide alcohol sensor
Detection Range	0.00%-0.1% BAC (0.00-0.50mg/l BRAC)
Test Accuracy	0.01%BAC (0.05mg/l BRAC)

Performance Metrics

Response Times

30 s Warm-up Time	5 s Response Time
-----------------------------	-----------------------------

Power & Dimensions

Power Input

- 2 x 1.5V AAA alkaline batteries (for tester)
- 1 x 1.5V Ag13 button cell (for clock)

Dimensions	75 x 30 x 20.5 mm
------------	-------------------

Additional Features

Item Number

LD007-AD6

Clock Accuracy	±2.0 seconds/day
