

Portable Digital Breath Alcohol Tester

This portable device measures blood alcohol content through breath analysis. It features a digital display that shows BAC levels in various units and provides indicators for low and danger levels.

Overview

Compact Alcohol Detection Solution

This portable digital breath alcohol tester is designed for rapid and reliable blood alcohol content (BAC) measurement via breath analysis. Engineered for both personal and professional applications, it features a clear digital display with multiple unit options and a built-in warm-up function to ensure measurement accuracy. Its compact design makes it an ideal tool for environments requiring quick, on-the-spot alcohol detection.

Technical Specifications

Supported Measurement Units	ppm, mg/100ml, g/l
Power Source	AA Batteries

Features

Key Functionalities

- Digital BAC display
- Automatic warm-up function
- Low result indicators
- Danger level alert system

Application Suitability

Personal Use • Professional Applications
