

Portable Digital Display Welding Machine

This portable welding machine is designed for heavy-duty applications. The machine features a digital display for precise control and monitoring of welding parameters.

Product Overview

Professional Performance

The ZX7-315D is a robust, portable welding machine engineered for demanding industrial tasks. It integrates a high-precision digital display that allows operators to monitor and adjust welding parameters with ease. Built for longevity and mobility, this unit is designed to provide consistent, high-quality weld performance in a wide variety of professional environments.

Technical Specifications

Model	ZX7-315D
Control Interface	Digital Display, Precise Parameter Control

Design & Utility

Portability

- Compact portable design
- Integrated heavy-duty wheels
- Industrial-grade construction

Environment Suitability

Heavy-Duty • Industrial Use
