

Portable Direct Drive Air Compressor

This is a portable air compressor with a direct drive mechanism. It is designed for easy transport and use in various applications requiring compressed air.

Product Overview

Portable Direct Drive Air Compressor

This portable direct drive air compressor features a fully enclosed housing designed for safety, preventing accidental burns during operation. With a focus on environmental protection and user comfort, it incorporates a new cylinder head design that achieves a 10 dB noise reduction. Its compact build, complete with integrated wheels and a handle, ensures easy portability across various professional and home environments.
