

# Portable Drill Bit Sharpener

This portable drill bit sharpener is designed for accurate and rapid grinding of drill bits. It features adjustable angles and a diamond grinding wheel for efficient and precise sharpening.

## Overview

A compact, portable design for convenient workshop and on-site use.

### Professional Portable Drill Bit Sharpener

This high-precision portable drill bit sharpener is designed to offer professional-grade grinding results for various drill bit sizes ranging from 2mm to 13mm. Featuring an electrically controlled, powerful DC motor, the unit provides stable frequency and high torque for efficient, long-lasting performance. Its user-friendly interface allows for accurate grinding of the front cutting lip, lip relief angle, and point angle without requiring extensive professional skills, significantly reducing maintenance costs and improving drilling efficiency.

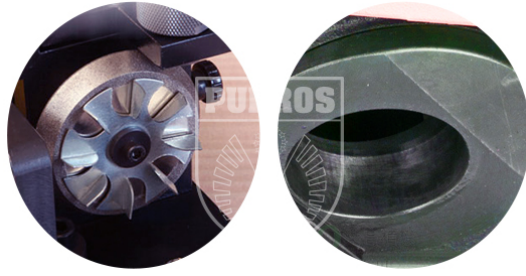

## Technical Specifications

Clear markings and adjustment settings for precise drill bit diameter selection.

Power Output	180 W
Grinding Diameter Range	2 - 13 mm
Weight	10 kg
Minimum Adjustment Range	1 mm

## Key Features

Precision diamond grinding wheel ensures accurate cutting angles and surface finish.

### Component Standards

Diamond Grinding Wheel • Bearing Shaft • DC Motor • Portable

### Grinding Functions

Front cutting lip, Lip relief angle, Point angle, Static point adjustment
