Product Overview

High-Performance Stainless-Alloy Extinguisher

This portable dry powder fire extinguisher is constructed from durable 304 stainless-alloy, offering robust corrosion resistance for long-term reliability. Engineered for versatility, it is suitable for diverse environments including industrial, commercial, and residential settings. The unit features an integrated pressure gauge for easy monitoring and is rated for effective performance against Class A and B fire risks.

Technical Specifications

Working Pressure	12 bar
Test Pressure	21 bar
Effective Discharge Time	8 s
Bulk Discharge Range	3 m

Performance & Safety

Fire Class Rating	1A • 21B
Material Composition	304 Stainless-Alloy
Standards Compliance	CE Standard, Normal Standard
