

Portable Electric Concrete Mixer

This portable electric concrete mixer is suitable for both DIY and professional jobs. Its 3.5 cubic foot drum has a 15-inch opening and large wheels for mobility.

Overview

Versatile Portable Concrete Mixing

This portable electric concrete mixer is designed for both professional construction sites and demanding home projects. Featuring a durable all-steel frame and a high-torque motor, it provides consistent mixing for cement, mortar, and plaster. The integrated large wheels and compact design ensure easy maneuverability and transport across various job site terrains.

QTP4108	550W	135L	385MM	42KG
QTP4540	650W	160L	390MM	60KG
QTP4055	1050W	220L	415MM	95KG

Design & Build

REPLACEABLE WHEELS

The mixer features a robust steel drum and large replaceable wheels for easy transport on construction sites.

Construction Features

- Durable all-steel frame construction
- 15-inch drum opening for easy loading
- Safety-equipped on/off switch
- Large wheels for rapid site movement
- Reinforced drum rim for rigorous use

Portability Features

Large Wheels • Compact Design • Replaceable Wheels

Ideal For

Cement, Mortar, Plaster, DIY Projects, Professional Gigs
