Product Overview

Versatile Mixing Solution

This portable electric concrete mixer is designed for both professional construction sites and DIY home improvement projects. Featuring a durable all-steel frame and a high-capacity drum, it ensures consistent mixing of concrete, mortar, and plaster. The integrated wheels and compact design allow for easy transport and stability across various job site terrains.

Performance & Power

Core Performance

650 W

Motor Power

160 L

Drum Capacity

390 mm

Drum Mouth

Design & Construction

The QTP4540 features a 160L capacity drum and a robust steel frame designed for efficient site work.

Key Features

- Heavy-duty all-steel frame for maximum durability
- Reinforced mixing blades for consistent material blending
- Large wheels for enhanced portability and movement
- User-friendly tilting mechanism for controlled pouring
- Safety-equipped on/off switch for hands-free operation

Technical Specifications

Technical Data

Parameter	Value
Model Number	QTP4540
Overall Dimensions	125 x 83.8 x 124 cm
Net Weight	60 kg
Motor Type	Electric

Applications

Suitable Materials	Concrete, Mortar, Plaster, Cement
