Product Overview

Versatile Portable Cooling and Heating

This portable electric cooler and warmer is designed for maximum convenience during travel, camping, and outdoor activities. It functions as both a refrigerator and a heater, providing flexible temperature control for your food and beverages. With dual power compatibility for both vehicle and household use, it is an essential companion for road trips and camping excursions.

Technical Specifications

Item Number	CBP-12L
Refrigeration Principle	Semiconductor Refrigeration
Insulation Material	High density EPS

Performance & Power

Power Consumption

48 W

Power Consumption

Power Sources	DC 12V, AC 100-240V
Cooling Performance	Down to 5°C at 25°C ambient temperature
Heating Performance	50-60°C (via thermostat)

Connectivity

Cable Specifications

Cable Type	Length
Car Charger Cable	2m
Household Cable	1.8m
