

Portable Electric Fan with LED and Solar Charging

This portable electric fan combines cooling with an LED lamp. It includes a solar panel for charging, offering versatility for use in locations with limited power.

Product Overview

Versatile Off-Grid Cooling and Lighting

This portable electric fan is designed for flexibility, combining cooling performance with integrated LED lighting. Featuring solar charging capabilities, it is an ideal solution for environments with limited electricity access or for outdoor use. The unit includes adjustable speed settings and a dedicated lamp function, ensuring both comfort and visibility in a single, compact device.
