Product Overview

High-Efficiency Portable Rebar Cutting Solution

This portable electric hydraulic rebar cutter is engineered for precision and efficiency on construction sites. Designed to be lightweight and compact, it offers a quiet operation without the production of sparks, dust, or odors, ensuring a safer work environment. It is the ideal tool for processing various reinforcement materials including deformed bars, round steel, and threaded rods.

Technical Specifications

Model	RC-16
Operating Voltage	AC 110V, AC 220V

Performance Metrics

Cutting Capacity

16 mm Max Diameter	4 mm Min Diameter

Features & Benefits

Safety & Operational Highlights

- Spark-free operation
- Dust-free cutting
- Odorless process
- Compact and portable design
- Easy to operate

Included Accessories

Standard Kit

- Metal carrying case
- Oil bottle
- Wrench
- Handle
- User manual
