

Portable Electric Rebar Cutter

This portable electric rebar cutter is designed for cutting steel reinforcing bars on construction sites. It features a powerful hydraulic system for efficient and clean cuts, ensuring precise and burr-free results.

Product Overview

Professional Grade Rebar Cutting

This portable electric rebar cutter is a high-performance tool engineered for precision on construction and bridge-building sites. Featuring a powerful hydraulic system, it delivers clean, burr-free cuts while maintaining a compact and lightweight form factor for superior portability. The unit is designed for heavy-duty application with an emphasis on operator safety and long-term durability.

Technical Specifications

Power Source	Electric
Drive System	Hydraulic
Safety Features	Safety Switch, Accidental Operation Prevention

Performance

Cut Quality

Burr-free • Precise

Primary Applications

- Construction Sites
- Bridge Building
- Rebar Fabrication
