

Portable Electric Space Heater

This portable electric space heater is designed for personal or small-area heating. It features an adjustable thermostat to maintain a consistent temperature and overheat protection for safety.

Overview

Portable Heating Solution

The PH325 is a portable electric space heater engineered for personal comfort and small-area heating applications. It utilizes an efficient fan-forced system to ensure consistent heat distribution throughout the space. Designed with mobility and safety in mind, this unit is an ideal choice for localized temperature control.
