

Portable Electric Space Heater

This portable heater is designed for space heating. It features a perforated front panel for efficient heat dissipation and comes with caster wheels for easy mobility.

Product Overview

Efficient Ceramic Heating

This 1000W ceramic space heater offers precise climate control for residential or professional environments. Featuring advanced electronic touch controls and a weekly programmable timer, it ensures optimal energy efficiency and comfort. With robust safety features like overheat protection and an IPX4 water resistance rating, it provides a reliable and safe solution for maintaining consistent indoor temperatures.

Performance Metrics

Power Output

1000 W

Rated Power

Electrical Requirements

- Voltage: 230V
- Frequency: 50Hz
- Class: II

Control & Features

Smart Features

- Weekly programmable timer (7x24 hours)
- Window detector function
- Child lock function
- 6-order pilot wire control

Operating Modes

Comfort, Economic, Anti-freeze, Stand-by

Design & Safety

Safety & Protection

IPX4 Rated • Overheat Protection

Physical Design

- Ceramic heating element with film
- Wall-mountable design
- Electronic touch button control
- LCD display
- Color: White
