

Portable Electric Tire Inflator Air Compressor

This is a compact and robust portable electric air compressor. It is designed for inflating tires and other inflatable items and is suitable for automotive, recreational, and household applications.

Product Overview

Compact Performance

This portable electric air compressor is engineered for versatility, making it an essential tool for automotive, recreational, and household inflation needs. Its robust design features a durable motor for consistent performance and an integrated pressure gauge to ensure accurate inflation every time. The unit is built for convenience, incorporating a coiled air hose that allows for easy storage and portability.

Technical Specifications

Model Number	D/TC-90
Power Source	Electric

Key Features

Core Features	Portable, Robust Design, Integrated Pressure Gauge, Coiled Air Hose
---------------	---

Applications

Suitable Applications

- Automotive tire inflation
- Recreational equipment
- Household inflatable items
