

Portable Electric Welding Machine

This portable electric welding machine is designed for metal fabrication and joining. It features adjustable power settings suitable for various welding applications.

Overview

Professional Portable Welding Solution

This portable electric welding machine is engineered for versatility in metal fabrication and joining tasks. Designed with a compact form factor and an integrated carrying handle, it offers exceptional mobility for on-site projects. The unit features adjustable power settings, ensuring compatibility with a wide range of welding applications for both professional and DIY users.

Technical Specifications

Model Number	DWS-160Z F4.4.4.4
Input Voltage	AC 220V / 380V
Output Voltage Range	DC 20-30V / 20-50V

Key Features

Design Features

Portable • Compact Design • Carrying Handle • Adjustable Power

Application Suitability	Metal Fabrication, Metal Joining, Professional Use, DIY Projects
