

Portable Electric Windlass with Remote Control

This portable electric windlass provides safe and efficient lifting capabilities. It features robust construction, a steel cable, and remote control for easy operation.

Product Overview

Portable Electric Windlass

The GF800A is a versatile and portable electric windlass designed for efficient lifting operations. Engineered with a robust 1200W motor, it provides reliable performance for various industrial and commercial lifting tasks. Its compact design and included remote control ensure ease of operation and enhanced safety for the user.

Rated Capacity

800 KG

Lifting Capacity

1200 W

Input Power

20 M

Lifting Height

Technical Specifications

Electrical & Operational

| Parameter | Value |
|---------------|-----------|
| Rated Voltage | 230V 50Hz |
| Lifting Speed | 9 m/min |
| Wire Diameter | 6 mm |
| Duty Cycle | M1 |

Safety & Compliance

Insulation Grade B, IP54 Protection, Breaking Strength >1870 N/M2
