

# Portable Equipment Carrying Case

This portable case is designed for carrying equipment. It features a sturdy frame and a retractable handle for easy transport.

## Overview

### Portable Equipment Carrying Case

This portable integral box is designed for the secure storage and transport of sensitive equipment. Featuring a robust construction with a durable frame and a reinforced upper section, it provides reliable protection for instrumentation and testing tools. The integrated retractable handle ensures ease of mobility, making it an ideal solution for field technicians and professionals requiring on-the-go equipment management.

## Design & Build

### Portability

- Retractable handle
- Portable design
- Equipment-focused build

### Construction Materials

Metallic Upper Section, Reinforced Frame
