

Portable Evaporative Air Cooler

This portable evaporative air cooler delivers a cost-effective and energy-efficient cooling solution. The unit uses evaporative cooling technology, drawing in warm air and passing it over a moistened cooling pad to release cool, humidified air.

Product Overview

Efficient Personal Cooling Solution

This portable evaporative air cooler provides a cost-effective and energy-efficient cooling solution for personal spaces like homes, offices, and dorm rooms. It utilizes advanced evaporative technology to draw in warm air and pass it over a moistened cooling pad, releasing a refreshing stream of humidified air. With its integrated caster wheels and adjustable settings, it offers a versatile and mobile alternative to traditional air conditioning systems.

Core Performance

Cooling Technology	Evaporative Cooling
Key Features	Energy Efficient, Cost-Effective, Humidifying, Portable

Operational Controls

Fan Speed Settings Adjustable Speeds	
Air Distribution	Oscillating louvers for wider coverage

Design & Portability

- Mobility Features**
- Integrated caster wheels
 - Portable lightweight design
 - Compact footprint for personal spaces

Maintenance

Water Tank Design	Removable tank for easy filling and cleaning
-------------------	--

Applications

- Ideal Use Cases**
- Home interiors
 - Office workspaces
 - Dormitory rooms
 - Small personal areas
