Product Overview

High-Efficiency Portable Cooling

This portable evaporative air cooler is designed to provide powerful and efficient climate control for medium-sized indoor spaces. With a substantial 80-liter water tank and a high-capacity airflow of 10,000 cubic meters per hour, it effectively lowers temperatures across areas up to 65 square meters. The unit is engineered for mobility and ease of use, featuring a robust design suitable for offices, workshops, and commercial environments.

Performance Metrics

Max Airflow

10000 cbm/hr
Max Airflow

Air Supply Distance	20 m
Effective Area	35-65m2

Technical Specifications

Max Wattage	310 W
Water Tank Capacity	80 L
Water Consumption	4-6L/hr

Physical Dimensions

Net Weight	19.5 kg
Dimensions (L*W*H)	700*540*1180mm

Logistics

40'HQ Capacity

144 sets
